In Home Supportive Services can make all the difference if you want to live at home, direct your own level of support, and preserve your independence. The economic pressures at the state and county level are impacting IHSS—and that means we need to know the facts and new developments.

If you are an IHSS recipient, provider, family member or advocate ... you'll want to be at this FREE forum and hear the latest on the new rules for eligibility, background/security checking, provider training, how to appeal service reductions and more.

**Seating is limited to 200 persons.
Registration is, first come, first served.**
