Accessibility Standards for Seniors and Persons with Disabilities

This directory now lists codes to define “accessibility” standards. These standards are meant to help seniors and persons with disabilities. The intent is that members can get in and around offices safely and without help from others. These codes are not yet listed for all providers. If you do not see these codes listed under a certain provider’s name, just call the office. You can ask if they have the type of access that you need.

Levels of Access

Basic Access

The office meets the standards below for parking, interior and exterior building, exam rooms, and restrooms (P, EB, IB, R, and E).

Limited Access

The office does not meet one or more of the standards below for parking, interior and exterior building, exam rooms, and restrooms (P, EB, IB, R, and E).

Medical Equipment Access

The office meets the standard below for exam tables and scales (T).

Accessibility Codes

P = Parking

Accessible parking spaces, including van accessible spaces(s), are present. Pathways have curb ramps between the parking lot, office, and at drop off areas.

EB = Exterior Building

Curb ramps and other ramps to the building are not too long. Ramps are wide enough for a wheelchair or scooter. Handrails are on both sides of the ramp. There is an "accessible" entrance to the building. Doors open wide enough for a wheelchair or scooter, and have handles that are easy to use.

IB = Interior Building

Pathways are wide enough for a wheelchair or scooter. Stairs, if present, have handrails. If there is an elevator, it can be used at all times the building is open. The elevator has easy to hear sounds and Braille buttons within reach. The elevator has enough room for a wheelchair or scooter to turn around. If there is a platform lift, it can be used without help.

R = Restroom

The restroom doors are wide enough for a wheelchair or scooter. The restroom has enough room for a wheelchair or scooter to turn around and close the door. There are grab bars which allow easy transfer from wheelchair to toilet. The sink is easy to get to and the faucets, soap, and toilet paper are easy to reach and use.

E = Exam Room

The doors to the exam rooms open wide enough for a wheelchair or scooter. The exam room has enough room for a wheelchair or scooter to turn around.

T = Exam Table/Scale

The exam table moves up and down and has space next to it for a wheelchair or scooter. The weight scale can be used by patients with wheelchairs or scooters.

Normas de accesibilidad para personas mayores y personas con discapacidades

Este directorio enumera los códigos para definir las normas de “accesibilidad”. Estas normas pretenden ayudar a personas mayores y a personas con discapacidades. La intención es que los miembros puedan entrar y desplazarse por las oficinas de manera segura y sin ayuda de otros. Estos códigos todavía no se encuentran enumerados para todos los proveedores. Si no ve estos códigos enumerados bajo el nombre de cierto proveedor, llame a la oficina del proveedor. Puede preguntar si tienen el tipo de acceso que usted necesita.

Niveles de acceso

Acceso básico

La oficina cumple con las normas de estacionamiento, interior y exterior del edificio, salas de examen y baños (P, EB, IB, R y E).

Acceso limitado

La oficina no cumple con una o más de las normas de estacionamiento, interior y exterior del edificio, salas de examen y baños (P, EB, IB, R y E).

Acceso de equipo médico

La oficina cumple con la norma para camillas de examen y básculas (T).

Códigos de accesibilidad

P = Estacionamiento (Parking)

Se cuenta con espacios de estacionamiento de fácil acceso, incluyendo espacios accesibles para van. Las entradas tienen rampas de acceso en las aceras entre el estacionamiento, la oficina y las áreas para dejar a las personas.

EB = Exterior del edificio (Exterior Building)

Las rampas en las aceras y otras rampas hacia el edificio no son demasiado largas; son suficientemente anchas para permitir el acceso de una silla de ruedas o un scooter. Los pasamanos se encuentran a ambos lados de la rampa. El edificio tiene una entrada “accesible”. La abertura de las puertas es suficientemente ancha como para permitir el acceso de una silla de ruedas o un scooter, y tienen asas que son fáciles de usar.

IB = Interior del edificio (Interior Building)

Los pasillos son lo suficientemente anchos como para una silla de ruedas o un scooter. Las escaleras, si las hay, tienen pasamanos. Si hay ascensor, puede usarse en todo momento en que el edificio esté abierto. El ascensor tiene sonidos fáciles de oír y botones Braille fáciles de alcanzar. El ascensor tiene espacio suficiente como para que una persona en silla de ruedas o scooter se dé vuelta. Si hay ascensor con plataforma, se puede usar sin ayuda.

R = Baño (Restroom)

Las puertas del baño son lo suficientemente anchas como para una silla de ruedas o un scooter. El baño tiene suficiente espacio para que una persona en silla de ruedas o scooter se dé vuelta y cierre la puerta. Hay pasamanos que permiten trasladarse fácilmente de la silla de ruedas al inodoro. Es fácil llegar al lavamanos, y las llaves, jabón y papel higiénico son fáciles de alcanzar y usar.

E = Sala de examen (Exam Room)

La abertura de las puertas que llevan hacia las salas de examen son lo suficientemente anchas como para una silla de ruedas o un scooter. La sala de examen tiene suficiente espacio como para que una persona en silla de ruedas o scooter se dé vuelta.

T = Camilla de examen/Báscula (Exam Table/Scale)

La camilla de examen se mueve hacia arriba y hacia abajo, y tiene espacio a un lado como para una silla de ruedas o scooter. Los pacientes en sillas de ruedas o scooters pueden usar la báscula.
